

Jilbère de Paris

NANO silver TOOLS™
CERAMIC

Nano Silver Tools from Jilbère de Paris **A new standard in styling tools**

Jilbère de Paris fuses the power of silver nano particles with ceramic and Sol-Gel technologies, plus advanced heating technology, to produce a line of professional-quality styling tools for fabulous results on all hair types.

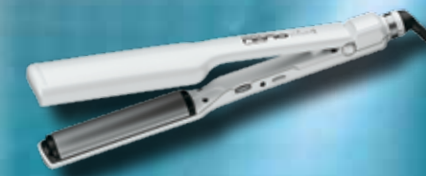

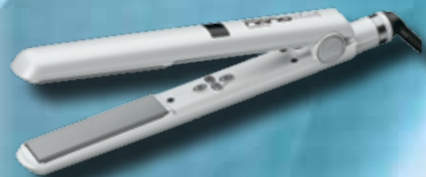

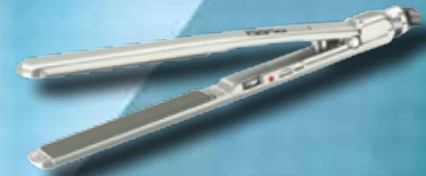

This versatile collection includes rotating barrel curling irons, a conical curling wand, ionic flat irons, ultra-thin plate flat irons, a digital memory flat iron and a curved plate wave styler, all engineered to the exacting standards you expect from Jilbère de Paris.

Ionic technology eliminates frizz and closes the cuticle, for a polished glossy shine, while far infrared heat gently and quickly styles the hair.

Make sure to take our new Nano Silver™ Wind 'n Curl styling iron for a spin. The rotating barrel offers superior flexibility and styling speed. This iron features 50 heat settings, up to 430°F. The stay cool tip and silicon thumb rest protect fingers from heat for comfort and control. And natural ions eliminate frizz for shiny, smooth, perfect curls every time. Just grip, spin and curl!

The Nano Silver Jumbo Conical styling wand creates chic, modern curls that start out wide and taper down to a smaller, tighter curl. The silicon guides channel and hold the hair in place for foolproof results as the heat resistant finger glove protects hands while styling.

So curl, straighten and wave with the greatest of ease...with Nano Silver Tools from Jilbère de Paris.
